How To Play

How to play

The Main Hero is a Hunter who progresses through the story while completing tasks.

[1] TOWNS (PG. 15)

Several Towns exist within the world. Start by asking the townspeople some questions. You will find various shops and facilities in each Town, as well as places called "Guilds," where you can get assistance in finding Tasks.

[2] GUILDS (PG. 17)

Guilds are where you undertake Jobs oriented for Hunters, and the starting point from where you head to the required destination. In Battles, your goal is to destroy enemies and monsters. Tasks such as searching for specific people or Items will differ depending on the Task you have undertaken.

[3] REGIONAL MAP (PG. 21)

When you depart from a Town, use the Regional Map to travel to the desired region within the world. Battles will commence once you have reached the intended destination related to the Task you have undertaken.

[4] BATTLES (PG. 22)

Battles take place in real time. Once you have achieved the objective of the Task you have undertaken, you will gain a Completion Bonus, Experience Points, or Dignity Points, whereupon the story will proceed.

How To Play *continued...*

Jobs and Hunter class

As a Hunter, your class increases each time you complete a Hunter Exam, which will eventually allow you to undertake more diverse Tasks. The procedure required to increase your Hunter class is outlined below.

[1] COMPLETE A TASK

Once you have achieved the objective of a Task, you will acquire Experience Points or Dignity Points, depending on the type of Task you have undertaken.

If you have amassed ten Experience Points and ten Character Points as a result of having completed several Jobs, you will be able to take a Hunter Exam. This test is necessary for you to rise to the next Hunter class.

[2] HUNTER TEST

The Hunter Exam is performed in the Town of Rueloon in Adenade.

In order to pass the test, you will have to fight several battles for your battle performance to be evaluated, all of which need to be completed. You will fail if you run out of time, do not complete the Battle, or die while trying to achieve the objective of a Battle. Should you fail the exam, you will not have to forfeit any of the Ability Cards with which you have been equipped.

[3] PASS THE TEST

If you complete all of the Battles in the Hunter Exam, you will rise to the next Hunter class.

As the Hunter class of the Main Hero increases, so will his maturity and Status.

Cards

About cards

Cards are Items or special attacking abilities that have been turned into cards able to be easily carried around with you. They have a very potent effect, which means they cannot be used by anyone other than Hunters. During Battles, you can only use Cards assigned to the "ALD" apparatus attached to your arm.

Types of cards

Cards are broadly divided into the following three types.

ABILITY CARDS (PG. 25)

Cards for Items or magic that can be used during Battles. Up to four of them can be assigned to your ALD, and once you have assigned them to it, the effects of all four Cards will be available in the Battle.

PARTS CARDS (PG. 26)

Cards that improve the performance of the Character(s) to whom they have been assigned. A maximum of three Cards can be assigned for Attack, Defense, and Special, and they will only be effective once they have been assigned.

CHARACTER CARDS (PG. 27)

Cards of Characters that can fight in Battles.

In order for a Character on a Character Card to be used in a Battle, it must be materialized in a Card Shop.

How to obtain Cards

Cards can be obtained in the following ways.

HOW ACQUIRED	ABILITY CARD	PARTS CARD	CHARACTER CARD
Bought in a Card Shop	Yes	Yes	No
Synthesized in a Card Shop	Yes	Yes	No
Acquired during a Battle	Yes	Yes	Yes
Acquired during an Event	Yes	Yes	Yes
Acquired at the Lottery house	Yes	No	Yes

Ability Cards

Ability Cards are assigned to the ALD in the menu, and are used in Card Mode during Battles.

When used during a Battle, these Cards will reduce the CP of your ALD by the CP consumption level designated on them. The ALD can hold up to 255 CP, as can each of the Sub-tanks. When your ALD runs out of CP, it will be automatically refilled by the CP in the Sub-tanks.

Diamond Dust

Cure

Strike Power

GIMMICK

Synthesizing Cards

New Cards are synthesized by combining Ability Cards and Parts Cards in Card Shops that have a Cardist.

Certain Cards can only be acquired by synthesis, so you will need to try out various combinations.

Please refer to pg. 16 for the procedure for synthesizing Cards.

Lottery House:

You will be able to acquire Cards from the Lottery House located in Dilzweld. You will need ten Mystery Cards (see pg. 29) in order to draw a card.

Hints

Status

The icons and abbreviations that indicate your Status as displayed on the menus are explained below.

ICON	ABBREVIATION	MEANING
	ELE	An attribute. Influences the extent of damage.
	STR	Muscular strength. Mainly influences the extent of damage caused in normal attacks.
	MAG	Magical power. Mainly influences the extent of damage caused by magic.
	TEC	Techniques. Mainly influences the amount of damage caused by gimmicks.
	DEF	Defense. Influences the extent of damage suffered.
	SPD	Quickness. Influences your speed of movement during battles.

Normal vs. combo fighting techniques

You can use a combo technique during fighting by repeatedly pressing the  button (used for normal attacks) during a battle. The combo technique allows you to continuously assault enemies and monsters, but will leave you highly vulnerable to attack. Be sure to scope out your surroundings carefully before you decide whether a normal or continuous attack would be more appropriate.

Using stepping to your advantage

You can step in numerous directions during a battle. Step backwards or to the right or left to evade attack, or step forward to tackle enemies or monsters depending on what the circumstances allow you to do.

For those who don't like fighting...

If Battles aren't your thing, try undertaking Tasks that involve searching. Search Tasks can be completed merely by getting the intended item, without even having to kill the enemies or monsters.

If you fail a Counter Task, you will forfeit the assigned Ability Cards. If you don't feel confident enough to complete a Task successfully, try assigning some of your other remaining Cards.

Materialized Characters

Here are some hints for acquiring and using Character Cards.

ACQUIRE CHARACTER CARDS - If you have received a Character Card from someone, you may also be able to acquire one during certain Battles. If you can't seem to acquire any, try your luck at the lottery.

LEARN THE TRAITS OF THE CHARACTER - Each materialized Character has a special method of attack. In essence, if they have a high STR, they will be expert attackers; if they have a high MAG, they will be powerful magicians; and if they have a high TEC, they will be highly adept with Gimmicks. Also, assigning a Card matched to the attributes of a Character will make the effect that much more powerful.

CHOOSE AN APPROPRIATE CHARACTER - Materialized Characters not only possess expert methods of attack, but are able to use their own techniques for defense, provocation, evasion, and other special moves. They can also move at different speeds. Using a Character suited to the Task description will let you proceed more smoothly through Battles.

ASSIGN CHARACTERS - Certain Parts Cards can only be used by specific Characters. Other Parts Cards can change the color of the Character once they have been assigned. Neither of these types is available at the Card Shop, which makes them hard to find. However, it's worth your while to keep your eyes peeled for them.

Mystery Cards

If you collect ten Mystery Cards, you will be able to go to a Lottery House and choose a card from a set of five. Acquire Mystery Cards by finding them during Battles or clearing the Image Box in the Lottery House. When playing online, you will be able to acquire numerous Mystery Cards.

Mofly Holes

Mofly Holes are small holes located in Towns and elsewhere. Only Hemo is able to fit in them with his small body. The knowledgeable Mofly clan who live in these holes will be able to provide you with a wealth of information.

Preparing For Online Play

Online Mode*

In Online Mode, you partake in Collaborative tasks and Battles with players from all over the world with your PlayStation®2 computer entertainment system connected over a network. In the descriptions that follow, the term "offline" is used to describe playing the game without being connected to a network, and "online" is used to describe playing the game while connected.

The online service is free to use; however, connection fees or other charges may be assessed by your Internet Service Provider.

*** Please Note:** The Online option will not be available until you save your data after becoming a Hunter and acquiring an "ALD" in the single-player game

Online vs. offline gaming

Below you'll find a comparison between online and offline gaming.

OFFLINE > ONLINE

If you materialize a Character Card in a Card Shop offline, you will be able to use the materialized character online as well.

If the Hunter class of a Character increases during an offline session as a result of the Main Hero passing the Hunter's Exam or Spirit Points being allocated to a materialized character, the Hunter class of the Character will also be elevated when you go online.

ONLINE > OFFLINE

All Cards acquired online can be used offline.

Try acquiring Mystery Cards and other Cards that are not so easily obtained offline.

You will only be able to collect all of the Cards when you are offline.

The equipment and environment you will need

The equipment required for online play is the same as is used for offline play (PlayStation®2 computer entertainment system, controllers, etc.), but the equipment and environment described below are also required. Please be sure you have completely read through the user guides pertaining to each device beforehand to ensure they will be used correctly.

MEMORY CARD

You will need a memory card (8MB) (for PlayStation®2) to store any data saved offline with your PlayStation®2 computer entertainment system. When playing offline, you have to go to a Guild to save your game (see pg. 18).

BROADBAND NETWORK CONNECTIONS AND TELECOMMUNICATION DEVICES

You will need to be connected via an ADSL line, CATV Internet line, FTTH line, or other similar networked line compatible with a PlayStation®2-compatible network adaptor (Ethernet). You will also need to use an ADSL modem or other telecommunications device for connecting to the broadband network line you will be using. USB modems are incompatible.

A separate cable or other link will be needed to connect the telecommunications device to the broadband network. For information on the type of cable required, please refer to this page or the user guide belonging to the telecommunications device you intend to use.

USB keyboard compatibility

If you have a USB-compatible keyboard, you will be able to use it for entering text online or offline, or for online chat (text-based conversation). Please refer to pgs. 40-41 for further information on online chat and text entry.

You will still be able to enter text and chat online even if you don't have a USB-compatible keyboard by pressing the START button and using the onscreen keyboard.

Getting Started Online

Pre-login procedure

In order to play online, you will need to have gone to a Guild in single player to save data after becoming a Hunter and acquiring an ALD (see pg. 30). Take the memory card (8MB) (for PlayStation®2) that contains your saved data, insert it into MEMORY CARD slot I, and choose [ONLINE] on the Title screen to go online. Your Card collection and other information will be saved automatically while you are playing online, so after selecting [ONLINE], be sure not to remove the memory card (8MB) (for PlayStation®2) until you have returned to the Title screen. In order to start playing online, you will need to "log in" to connect to the server. The pre-login procedure is described below.

[1] THE SELECT CONNECTION PROVIDER SETTINGS SCREEN

First, select "Login" once you have confirmed the connection provider settings you wish to use to connect to the network.

If you want to use settings that are different from those specified in the currently selected connection provider settings, go to [Select data] to choose the location where the desired connection provider settings have been stored. Connection provider settings stored on a memory card (8MB) (for PlayStation®2).

If no connection provider settings exist, or if you wish to edit existing ones, select [Edit your network settings] and create a new set.

[2] SELECT A SERVER

Next, select a server to which you wish to connect. Only players that are connected to the same server will be able to play together. You will not be able to select a server that has already reached its maximum number of participants.

[3] SELECT SAVED DATA

Last, select the saved data you wish to use when you log in. If you are logging in with saved data for the first time (i.e., if you have not yet created an Account), select the saved data you wish to use and then proceed to "4. Create a new Account."

If you are logging in using saved data or an Account you have created, you will be able to select [Connect] or [Delete]. If you select [Connect], proceed to "5. Login screen."

[4] CREATE A NEW ACCOUNT

An Account serves as a name that identifies you as a player. Once you have entered the following items and selected [Create], return once more to "3. Select saved data."

Account name Title used as the player's name

Password A secret word known only to the player, and required for logging in

Save password Select whether you wish the password to be saved

[5] LOGIN SCREEN

On the Login screen, confirm the account you wish to use and connect to the server. Enter the password corresponding to the Account name (cannot be changed), and select [Connect]. If the password has been saved, it will be entered for you. In order to save the password you have entered, choose [Yes] under [Save password].

[6] CONFIRM TERMS OF USE

When you connect to the server, the "Terms of Online Use for Arc The Lad®: End of Darkness" will be displayed. If you select [Agree] after having accepted the terms, the Online menu will be displayed.

[7] ONLINE MENU

Once you have successfully logged in, the Online menu will appear. Please refer to pg. 34 for information on the Online menu.

Saved data and Accounts

SAVE DATA 1, 2, and 3 are the locations where you can save data, but a separate account must be created for each one. In other words, it is not possible for SAVE DATA 1, 2, and 3 to be played from a single Account, nor can you log in to your own Account using another player's saved data.

Account information used online is also recorded as saved data. Therefore, using the memory card (8MB) (for PlayStation®2) on which the saved data has been stored will allow you to maintain the same online player identity regardless of which PlayStation®2 computer entertainment system you use, provided that the console has been configured for the requisite environment.

If you saved your password either on the Login screen or at the time you created a new Account, your Account name and password will be stored with the saved data. If your Account name and password have been stored as saved data, anyone will be able to log in by using that Account name, so be especially careful when managing your Account.

Online Menu

Online menu

The Online menu displays important notices and gives you the following choices:

[1] SELECT AREA

Select the Area in which you wish to play. Each server is divided into several Areas. Only players who have selected the same Area will be able to play together.

The list shows, from left, the name of the Area, the number of participants, and the maximum number of participants. You will not be able to select any Area that has already reached its maximum number of participants.

Once you have selected an Area, the Area menu will be displayed. Please refer to the right-hand page for further information on the Area menu.

[2] CO-OP PLAY RANKING

Area Menu

Area menu

Selecting an Area to play from [Select area] on the Online menu will cause the Area menu to be displayed. From the Area menu, use the **L1** or **R1** button to change the Character used in Battles shown in the upper left portion of the screen. You are also able to select one of the other items below.

[1] COOPERATIVE TASKS (PG. 38) – In this mode, up to four players can cooperate to undertake a Task. In addition, up to eight players will be able to engage in a "Battle Royale" in which each player fights for themselves.

[2] EASY TASK (PG. 38) – In this mode, four players can tackle simple jobs. A job having few stages and a short completion time will be randomly selected from among the Cooperative Tasks.

[3] 4X4 COMPETITION (PG. 38) – In this mode, up to eight players can engage in 4-on-4 team combat.

[4] 1X1 COMPETITION (PG. 39) – In this mode, two players engage in individual combat.

[5] PREPARE FOR BATTLE – Assign Cards or make other preparations necessary for a Task or Battle. The menu is virtually identical to the offline version, except that you are also able to see how many Cooperative Points and Competitive Points you have in the upper right portion of the screen. Please note that once you enter a Room, you will not be able to change your Characters or equipment.

[6] EDIT CHAT ICON – Edit the Icon Chat text that you can use in Rooms or during Battles.

[7] FRIEND LIST – The Friend List is similar to an address book in which you are able to register players you know (Friends). You can store up to 30 entries. Select an entry shown as [Open], and enter an Account name to register a new Friend. If you select an entry that shows a Friend's Account name, you will be able to locate their whereabouts, send them a Message, or delete them from the Friend List. Messages let you send text to others on the Area menu currently in the same Area as you. You are not able to send Messages to Friends during Tasks or Battles.

[8] LEAVE AREA – Leave the Area and return to the Online menu.

Playing Online

Cooperative Tasks

In this mode, up to four players undertake Tasks cooperatively. Once you have completed a Task, you will acquire Cooperative Points.

You clear stages as you progress through the Job. Even if you fail to win a Battle in a certain stage, you will be resurrected and all your Hit Points replenished in the next stage. In a "Battle Royale," as many as eight players fight for themselves and try to survive to the bitter end.

Easy Tasks

In this mode, four players undertake an Easy Task. Once you have completed the Task, you will acquire Cooperative Points.

The small number of stages and the simplicity of the Tasks allow them to be completed more quickly than Cooperative Tasks.

4X4 COMPETITION

In this mode, up to eight players can engage in 4x4 team combat. If you are on the victorious team, you will acquire Competitive Points.

Victory is achieved either by completely wiping out your opponents' team or by having the greater number of Characters alive when the time runs out.

1X1 COMPETITION

In this mode, two players engage in individual combat. If you emerge as the victor, you will acquire Competitive Points.

If the time runs out without either of you winning, the Battle will be regarded a draw.

Starting Tasks and engaging in Combat

Once you have selected the mode you wish to play from the Area menu, you will enter a player waiting room ("Room"), from which you proceed into Battle. The procedure you follow before entering a Room will differ according to the selected Mode. Please refer to pg. 38 for further information on Rooms.

COLLABORATIVE TASKS / 4X4 COMBAT COMPETITION

Select a Room to join from the Room list, and press the  button to bring up information on the Task or combat session designated for that Room. Select [Yes] to accept, which will let you enter the Room. Select [New] from the list to create a new Room and recruit other players to participate.

EASY TASKS / 1X1 COMBAT COMPETITION

If you select a Easy Task or 1x1 Combat Competition, you will enter the Room immediately. You are not able to create new Rooms in this mode.

How to create Rooms

If you select [New] from the list of Rooms used for Collaborative Jobs and 4x4 Combat Competition, a new Room will be created, after which other interested players can be recruited. The player who has created the Room will be referred to as the "Leader."

When you create a Collaborative Task Room, you will first have to select the Task you wish to undertake, after which you can set up the Room. When you create a 4x4 Combat Room, you will be able to set it up immediately. The options used to set up a Room are shown below. Once the Room has been completely set up, select [Create] and enter the Room.

CHANGE TITLE

Change the name of the Room displayed on the Room list.

FRIENDS ONLY

Decide whether you only want your Friends to participate. If you choose [Yes], players not registered as Friends by the Leader will be barred from entering the Room.

PASSWORD

Set a password for entry into the Room. Once a password has been set, players who do not know it will be barred from entering the Room.

Playing Online *continued...*

Rooms

In Rooms, players become the Characters they have selected from the Area menu, and appear onscreen. The Account names and chat comments relating to the Characters will be displayed above their heads. The Character whose Account name is underlined is the Leader.

Exits from the Room are located at the bottom left and top right. Leaving the Room via the lower left exit will return you to the Area menu. When the Leader leaves via the top right exit, the Battle will commence. When the Leader leaves the Room, another player becomes the Leader. The pre-Battle procedures for each mode are shown below.

COLLABORATIVE TASKS

Once all players who will be participating in a Task have been assembled, the Leader should leave via the top right exit to commence the Task. Tasks can commence even if fewer than the maximum number of participants are present.

As is also the case with a "Battle Royale," in which as many as eight players fend for themselves, the Battle will automatically commence the moment the Leader leaves via the top right exit, regardless of how many participants are present.

EASY TASKS

Once you have entered the Room, you will have to wait until four players have assembled. The Task will commence automatically once all four players are present.

4X4 COMBAT COMPETITION

Once all players who will be participating in Combat have been assembled, the Leader should leave via the top right exit, whereupon you will proceed to the Select Combat Opponent screen. Combat can commence even if fewer than the maximum number of participants are present.

On the Select Combat Opponent screen, you will see a list of other Rooms where combat can take place. The list will show the Room name (Party name), the Account name of the Leader, and combat record of each Leader starting from when they created their respective Rooms.

To apply for Combat, choose a Room and press the **X** button. If your opponent accepts your challenge, the Battle will commence.

If you are awaiting an invitation for Combat, stand by on the Select Combat Opponent screen. Once you receive a Combat invitation from another Room, select [Yes] to start the Battle.

1X1 COMBAT COMPETITION

As with 4x4 Combat Competitions, Battles will commence when you apply for Combat or when you have been invited for Combat.

Battles

When a Task or Battle has commenced, the Battle screen will be displayed. It is the same as the offline version except for the aspects detailed below. Refer to pg. 23 for the information displayed on the Battle screen.

ACCOUNT NAME

As with Rooms, Account names and chat comments relating to the Characters are displayed above their heads. From your point of view, the Account names of your allies will be blue, while those of the enemy will be red.

TIME REMAINING

The amount of time you have left will be displayed in the upper right portion of the screen.

DYING IN BATTLE

Characters who die in a Battle will become semi-transparent and have no further effect on the other players. Such characters will still be able to make comments using chat.

Soft reset

Your participation in a Room or Battle online can be reset by simultaneously pressing the **L1**, **L2**, **R1**, **R2**, **SELECT**, and **START** buttons, which will return you to the Area menu. Performing a reset while within a Room will have the same effect as if you had left a normal Room and return you to the main online menu. If you perform a reset during a Battle, you will keep any Cards or other acquisitions in your possession at the time of the reset, but will forfeit any Cooperative Points and Combat Points.

Cooperative Points and Competition Points

The number of participants at the start of a Battle, the Hunter Class of the Character you are using, and other factors will have the following effects on the points you are able to acquire while on a Task or engaged in Combat.

NUMBER OF PARTICIPANTS AT START OF BATTLE

The fewer allies you have alongside you while you undertake a Task or engage in Combat, the more points you will be able to acquire.

CHARACTER PLAYED

The lower the Hunter Class of the Character you enter into a Battle, the more points you will be able to acquire.

Chat

About chat

Chat is a way to converse using text. You can chat away on the Area menu, in Rooms, or during Battles. You can use Keyboard Chat, which allows you to type whatever text you like, or Icon chat, which allows you to make comments by selecting predetermined messages.

KEYBOARD CHAT

Can be used in the Area menu as well as in Rooms and during Battles. You can enter text using an onscreen keyboard that you operate with your controller, or a USB-compatible keyboard.

ICON CHAT

Can be used in Rooms and Battles. Icon Chat cannot be used on the Multiplayer menu, since Characters do not appear on it.

Onscreen keyboard

In situations where you can use Keyboard Chat, press the START button to display the onscreen keyboard. The onscreen keyboard is controlled as shown below. Select [Comment] once you have finished entering your message.

If you are using a USB-compatible keyboard, connect it directly to one of the USB terminals on your PlayStation®2 computer entertainment system before turning it on, and do not remove it once the power has been turned on. A USB hub cannot be used. Certain devices may not always function correctly.

In situations where you can use Keyboard Chat, a text entry window will appear as soon as you input any text from a USB-compatible keyboard.

Icon Chat

Icon Chat is a function that lets you make comments using simple actions. If you have already used [Edit Chat Icon] on the Area menu to compose the messages you would like to use in conversations, then you will not need to use the onscreen keyboard or a USB-compatible keyboard to enter text (see pg. 40). Icon Chat can be used in Rooms or during Battles, since Characters appear in them.

HOW TO USE CHAT ICON

If you press the R3 button (right analog stick) in a Room or during a Battle, icons bearing default text will be displayed. To send a comment written on one of the icons, tilt the right analog stick in the direction of the icon bearing your desired comment. If you want to exit commenting mode, tilt the right analog stick towards you and select "Cancel." Pressing the R3 button (right analog stick) again while the icons are displayed will convert their messages to the ones you composed with [Edit Chat Icon] on the Area menu (see pg. 35).

Edit Chat Icon

If you select [Edit Chat Icon] from the Area menu, you will be able edit messages of your choice that you can use for Chat Icon.

You can set seven different Icon Chat messages for use in Battles and Rooms respectively. Select the icon you wish to edit, and press the ⊗ button to display the onscreen keyboard. Enter your chosen message and hit [Enter].

Selecting [OK] from the Select Icon screen will confirm your current choices.

Press the Ⓢ button to ignore any changes you made to the message and return to the Area menu.

6.3 You may not assign any rights or obligations hereunder without the prior written consent of NAMCO. The rights and obligations of the parties shall be binding, upon, and inure to the benefit of, the respective legal representatives, successors and permitted assigns of the parties.

6.4 NAMCO's failure to exercise any of its rights hereunder shall not constitute or be deemed a waiver or forfeiture of such rights. No waiver of any right or obligation under this Agreement shall be effective unless in a writing, specifying such waiver, executed by the party against which such waiver is being enforced. A waiver by either party of any of its rights hereunder on any occasion shall not be a bar to the exercise of the same right on any subsequent occasion or of any other right at any time.

6.5 This Agreement constitutes the entire agreement and understanding between the parties with respect to the Online Game and supersedes any previous communications, representations, or agreements by either party, whether verbal or written.

6.6 Except for any action by NAMCO seeking injunctive relief with respect to any violation of NAMCO's intellectual property rights by you (including in connection with any use by you of the Online Game in an authorized manner), any dispute between you and NAMCO involving this Agreement shall be settled by binding arbitration in accordance with the then-in-effect Comprehensive Arbitration Rules and Procedures of JAMS (the "Rules"). The venue of the arbitration and any related proceedings shall be Santa Clara County, California. There shall be a panel of three neutral arbitrators, selected in accordance with the Rules. In addition to the information exchanges facilitated by the Rules, the parties shall be entitled to discovery in accordance with the Federal Rules of Civil Procedure for a period of 60 days after the last responsive pleading is filed. Any unresolved discovery disputes may be brought to and disposed of by the chair of the arbitration panel. Disputes with respect to the admission, rejection and consideration of evidence shall be governed by the Federal Rules of Civil Procedure and applicable Federal law. The arbitration panel shall choose California law as the applicable substantive law and its award and decision shall conform to such law. The decision and award of the arbitration panel may be by majority. The arbitration award and decision shall be in writing and shall specify the factual and legal bases for the award and decision. The arbitrators may award costs and fees to the prevailing party, including the arbitrators' and administrative fees, out-of-pocket expenses, witness, expert and attorneys' fees. The prevailing Party may enforce the award and decision in any court of competent jurisdiction.

The background of the cover is a dark, atmospheric illustration of a cave or dungeon. It features gnarled, tree-like rock formations, a central stone pillar with intricate carvings, and several dark, circular openings or pits. The overall tone is mysterious and foreboding.
